ARCHE LEG

ASTRO, WITH ARCHE WORK SOLO OR AS PART OF A TEAM

MULTI-WORKSTATION ARCHE LEG

“We wanted to renovate the office with designer desks, shared to optimise the space. With ASTRO, the working area seems more spacious and everyone was able to customise their workstation.”

Paul
Architect in Massy.

1- POSITION WORKSTATION WITH EXTENSION

“The ASTRO desks are highly contemporary. The rectangular Arch leg is very sober and the selection of finishes is superb. Customers adore my office.”

Arthur
Advertiser in Nice.

DATA SHEET

The **Astro Arche leg design** is an epoxy finish metal arch, cross-section 70 x 30 mm. The Arche leg is available in single version for 1-position workstation and/or double arch for shared workstations.

The **ASTRO Arche range** is based on a self-supporting beam system with raised desk tops, forming a full steel underframe with 2 Arche legs and a transverse beam.

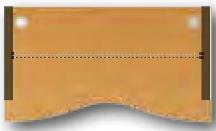

The **adjustable screw jacks** on the legs allow up to 15 mm adjustment so that the 72 cm high desks stay flat, to compensate for any defects in the floor. In back-to-back configuration, a space divider can be fitted in the 3 cm gap provided between the tops.

The **25 mm thick Structurex® tops** are protected by 2 mm thick shock-proof ABS edging and are equipped with at least one 80 mm diameter cable port. For 160 x 80 cm tops, a variant is available with top access compatible with a cable channel (plug & play).

The **suspended Astro Arche** modesty panel is optional.

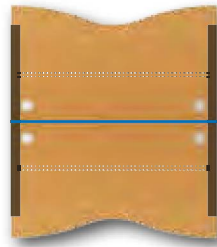

Available in translucent Plexi, metal or Structurex® finish. It is attached under the top with stylish brackets. This option is not compatible with the plug & play cable channel. Other channels designed to route cables and accommodate power outlet strips are available on option.
